Announces 2019 Summer Exploration Plans

- 
- 92 Resources announces 2019 summer exploration plans
 - Midland's Mythril copper/gold discovery is adjacent to 92 Resources
 - Shares trading at \$.04 with a \$4 million market cap
 - NTY in CAD, RGDCF in the US, and R9G2 in Germany

Summary

This past week 92 Resources announced their 2019 summer exploration plans. Their property is directly adjacent to the south of Midland Exploration's Mythril discovery and immediately east of Azimut Exploration's Pikwa property.

Highlights include:

- **At Corvette-FCI, the company will conduct surface work (rock/soil sampling) around their Golden Gap prospect where historical work has returned 3.1 to 109 grams per tonne Au in outcrop and 10.5 g/t Au over seven meters in a drill hole. This is also the area of the property closest to the porphyry-style Mythril discovery.**
- **At FCI-East and Corvette, the company will focus on identifying the source of the high-grade boulder field (up to 38 g/t gold) that characterizes the Lac Bruno prospect. A soil sampling grid will be completed up ice of the boulders and extend from the FCI-East block onto the 100-per-cent-owned Corvette block, where the source is interpreted to reside.**
- **The company will prospect further along the lithium trend that extends across the FCI-East block.**
- **The field crews are scheduled to mobilize in early July, 2019, with the program anticipated to be completed over a three-to-four-week period.**

For a more detailed look at the 92 Resources project see my initial report at:

Upcoming Catalysts

- **In mid-July Midland Exploration is scheduled to begin releasing drilling results from their phase II Mythril drill program. A couple of drill holes in the southern area of the project are scheduled to be collared near the 92 Resources border. Any success with the drill bit should have a dramatic positive impact on 92 Resources.**
- **News flow from the company's summer exploration program should begin in the July/August time frame.**
