Libero Copper & Gold

November 25, 2019

The Big Red Project – Successful 2019 Work Program Completed – Assays Pending

LIBERO
COPPER & GOLD

- **Successful 2019 in the books**
- **Sampling of 2.91 g/t gold over 250 meters (5 – 50 meter samples) at the Copper Bowl target**
- **Two holes drilled (588 meters) at the Copper Bowl high grade gold target -**
 - **mineralisation appears to be associated with quartz-pyrite and banded carbonate-chlorite veins**

Summary

Libero has wrapped a very successful 2019 campaign at their Big Red Project in the Golden Triangle of British Columbia and additional news flow is expected in January with results from the company's two-hole drill program. The company drilled two holes in difficult conditions after most other companies had left the area after getting a delayed start to the 2019 drill program due to a slow permitting process.

Overall, the company achieved several key objectives:

- Completion of two drill holes**
- The two drill holes visually look mineralized**
- Discovered an additional two targets with outcropping mineralization**
- Flew a ZTEM survey**
- Completed numerous chip sampling with multiple high grade results**
- The drill rig and fuel have been left at the camp to provide a jump start to the 2020 season.**

Share Price

Tax loss selling happens every year and this year has been especially brutal for most juniors. Libero has been caught up in this as well as the chart shows below. The share price currently sits near 12-month lows and offers an attractive entry point:
